INSTRUCTIONS FOR THE MULTIVARIATE DATA ANALYSIS PROJECT

Projects should be done in groups of 2 or 3 students that are listed previously.

- The project consists of applications of the analyses that you have learned in the course and it should be given in a report in pdf format.
- You can choose one of the data sets that are listed in "MULTIVARIATE DATA SOURCES.pdf" file which you can find in the mentioned data bases or you can prefer to use a data set according to your personal interest. Please contact me for my approval.
- The report should have maximum 12 pages. The report may contain an appendix with supplementary material.
- The report should include following sections:
    - Title page with the name of the project and the name of the students
    - An index (outline) page
    - Introduction section indicating the purpose of the project, basic description of the data and the methods that are used in the analyses.
    - Results of the analyses and their interpretations
    - Conclusions and discussion
    - Bibliography
- The reports should be written in English or in Spanish.
- The pages of the report should be numbered.
- The due date of the project is **June 4th, 2023 at 11:59pm.**
